payroll PROTECT

BRAND KIT · FILM AND MOTION

Don’t approve what you can’t prove.

Colour, type, illustration and animation for anyone filming or animating PayRoll Protect. Every value here is taken from the website.

payrollprotect.co.uk · October 2026

Five rules for every frame.

1 · Lime means verified.

#0FD76A appears only when something is verified at the gate, or when the viewer can act (book a pilot). Never as decoration.

2 · Amber means held.

#E8A200 marks a discrepancy: hours over the gate record, a missing scan. Nothing else is amber.

3 · Show the record, not a picture.

Graphics are instruments: invoice lines, gate records, timelines and links, drawn in hairlines with mono labels. No decorative illustration, stock icons or mascots.

4 · One spring for everything that moves.

A quick start and a long, soft landing with about 1% overshoot. No bounce, no elastic, nothing at constant speed.

5 · Dusk on a real site.

Grey hoarding, wet ground and galvanised steel under a cool dusk sky. The green verify light is the only saturated colour in frame.

- Light logo on dark grounds and footage; dark logo on light grounds. The shield alone is for small spaces.
- Don’t recolour, redraw, stretch, outline, or add shadows or glows.
- In motion, bring it on whole: a fade with a short rise on the spring. No spins, bounces or builds.
- Write the name as **PayRoll Protect**. Logo files (transparent PNG, up to 6250 px) are supplied separately.

Neutrals carry the frame. Colour means something.

Gunmetal
#1F2326 · 31 35 38
Dark stages, text, the deepest tone.

Canvas
#F3F4F4 · 243 244 244
Light grounds.

White
#FFFFFF · 255 255 255
Cards, panels, text on gunmetal.

Lime
#0FD76A · 15 215 106
Verified, and calls to action. Only.

Amber
#E8A200 · 232 162 0
Held, discrepancy. Only.

- **Gunmetal 2** #262B2F
- **Gunmetal 3** #30363B
- **Gunmetal 4** #3B4247
- **Canvas 2** #E9EBEB
- **Ink 2 · body text** #4F565C
- **Ink 3 · labels** #636A70
- **Ink 4 · rules, not text** #A3AAAF
- **Lime ink** #067A3D
- **Amber ink** #8A5B00
- **Amber line · chart lines** #B47B00

- Text on gunmetal: white (15.8:1). Secondary text at 74% or 52% white.
- On a lime button the label is gunmetal (8.3:1), never white (1.9:1).
- Hairlines: gunmetal at 8% and 14% on light; white at 8% and 16% on dark.
- Lime as text only on gunmetal (8.3:1). On light grounds use lime ink (5.4:1).
- Amber as text only on gunmetal (7.2:1). On light grounds use amber ink (5.9:1).
- No gradients beyond a soft green or amber glow behind a result. Values are sRGB (same primaries as Rec. 709).

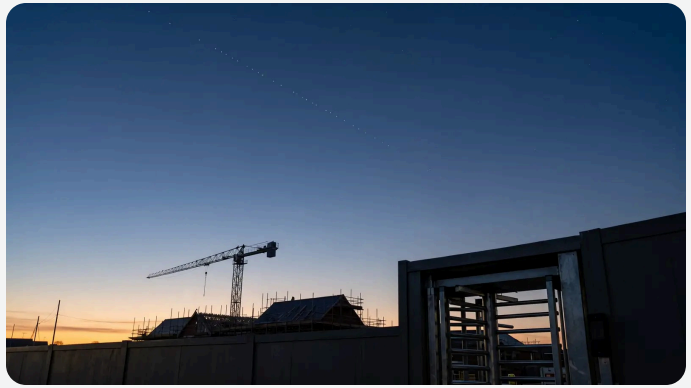

Dusk on a real site.

HERO FILM, FIRST FRAME

HERO FILM, VERIFIED

ORBIT FILM, LAST FRAME

THE VERIFY LIGHT

- Blue hour: a cool, overcast sky with a low warm glow on the horizon.
- Grey hoarding, galvanised steel, wet tarmac that carries reflections.
- The green verify light is the hero and the only saturated colour. Hi-vis and signage sit back in the grade.
- Camera moves are slow, continuous and motivated: push toward the gate; pull back and tilt up from the terminal to the sky.
- These stills are AI-generated references for the look, not real customer sites. Never present them as installs.

SAMPLED FROM THE FILMS

Dusk sky #AEB9CC	Horizon glow #F6CBA7
Hoarding #4B535B	Wet tarmac #4E545D
Galvanised steel #58616A	Verify light #02D25D
Night sky #153456	Last light #D1AD8A

CONSTRUCTION PAYROLL VERIFICATION

Don’t approve what you can’t prove.

Every line, matched to the gate.

Ghost workers

Biometric attendance at the gate, matched line by line against every subcontractor labour claim.

£1.4bn 02 | LINE-BY-LINE MATCHING W-0412 · 42.0 h

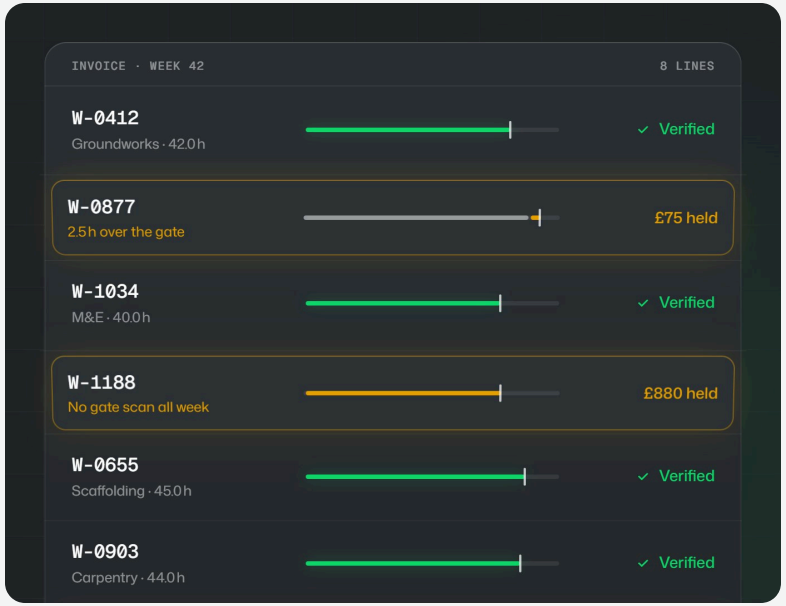

ROLE	FONT	WIDTH	WEIGHT	TRACKING	LEADING
Display	Mona Sans	125	330	-3%	1.0
Headline	Mona Sans	125	380	-2%	1.06
Title	Mona Sans	112.5	500	-1%	1.28
Body	Mona Sans	100	400	0	1.6
Figures	Mona Sans	112.5	320	-2%	1.0
Labels	Geist Mono, caps	–	500	+10%	1.0
Data, IDs	Geist Mono	–	400	-1%	1.55

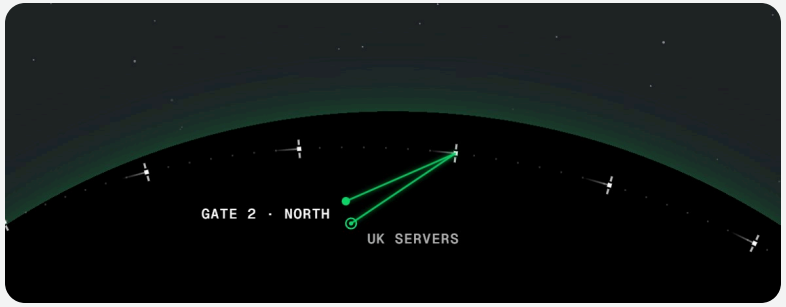

- Both fonts are free under the SIL Open Font License, video included. Mona Sans: github.com/github/mona-sans. Geist Mono: github.com/vercel/geist-font.
- Mona Sans is variable: set width 125, weight 330. If your app can’t set axes, use the Expanded Light instance.
- Captions on film: display style in white, left-aligned, at most half the frame wide, over a soft dark shade (#0E1113, 30–75%), never a box. The closing line may turn lime.
- Figures always count up digit by digit; never cut straight to a total.

Instruments, not illustrations.

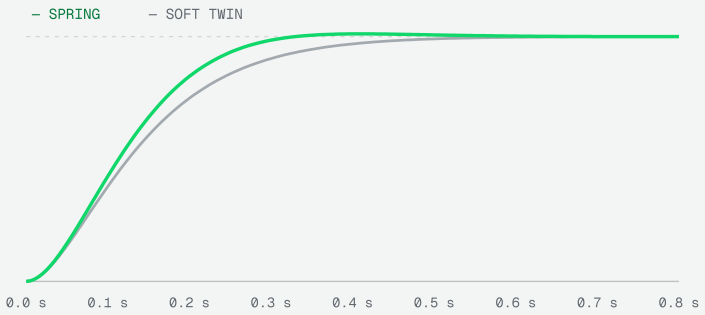

- Every graphic shows evidence the product produces: an invoice line against a gate record, a week of scans, a satellite link. No information, no graphic.
- 1 px hairlines; faint grid panels behind data; viewfinder corners around a product surface.
- Labels and IDs in uppercase Geist Mono (W-0412, GATE 2).
- Grey is claimed. Lime is verified at the gate. Amber, often hatched, is unverified or held.
- Light instruments on light grounds; dark stages (gunmetal with a faint dot grid or starfield) for big moments.
- Label example data on screen: “Illustrative invoice. Rates and hours are examples.”
- No decorative illustration, stock icons, mascots, 3D blobs or purple gradients.

One spring for everything that moves.

Stiffness 180 · damping 22 · mass 1. Damping ratio 0.82, ≈1% overshoot, settles in 0.65 s.

USE	SECONDS	FRAMES @ 25 FPS
Hover, press, small UI change	0.15–0.25	4–6
One move on the spring	0.65	16
Major reveal (never shorter)	0.45 +	11 +
A sequence	0.8–1.4	20–35
Stagger between related items	0.08	2
Ambient loop cycle	4–6	100–150

- **Spring** for anything that travels or scales.
- **Soft twin** (no overshoot) for fades, numbers and anything that must not pass its target.
- **Harmonic** (sine in-out) for ambient loops only, and only where a frame would otherwise freeze.
- Causal order: structure, then content, then the result. Never show a conclusion before its evidence.
- Move and fade only: position, scale, opacity. Colour changes are crossfades.
- Nothing over 2 s, nothing at constant speed, nothing snaps. No bounce or elastic.

CURVE	CUBIC-BEZIER	AFTER EFFECTS KEYFRAMES
Spring	0.22, 1, 0.36, 1	out 22% · in 64%, speed 0
Soft	0.25, 0.9, 0.35, 1	out 25% · in 65%, speed 0
Exit	0.65, 0, 0.75, 0.1	out 35%, speed 0 · in 25%
Harmonic	0.37, 0, 0.63, 1	out 37% · in 37%, speed 0

Cubic-beziers approximate the spring. For the exact curve use the expression on the next page.

Signature moves.

MOVE	WHAT HAPPENS	VALUES
Rise in	Items arrive in reading order, rising as they fade in.	16 px rise · spring · 80 ms stagger
The check	Claim drawn, then the gate record grows to meet it, a guide drops, the overrun grows in amber, the result rises.	0.15 · 0.35 · 0.75 · 0.9 · 1.05 s
Verified	A tick scales in on a soft lime disc.	scale 0.6→1 · 0.45 s spring
Ping	A thin ring leaves a status dot and fades.	scale 1→2.4 · 55%→0 · first third of a 2.4–5 s cycle
Scan	A line of light crosses a screen or a sheet, top to bottom.	1.06 s pass every 4.8 s · harmonic
Count up	Digits roll into place left to right, each decelerating.	0.9 s soft · 50 ms per digit
Light up	Headline words brighten one by one from 16% to full.	≈100 ms per word
Lock on	Viewfinder corners close in on what matters.	scale 1.18→1 · 0.6 s spring
Decode	Mono labels type in behind a soft block caret.	0.16 s fade per glyph

AFTER EFFECTS: THE EXACT SPRING (PASTE ON ANY KEYFRAMED PROPERTY)

```
// PayRoll Protect spring: stiffness 180, damping 22, mass 1.
// Each move between two keyframes follows the spring, stretched
// to the keyframe gap (0.65 s is its natural length).
var SOFT = false; // true for fades and numbers: no overshoot
var w0 = Math.sqrt(180), z = 22 / (2 * w0), wd = w0 * Math.sqrt(1 - z * z);
var T = SOFT ? 0.69 : 0.645;
function curve(t) {
  return SOFT ? 1 - Math.exp(-w0 * t) * (1 + w0 * t)
    : 1 - Math.exp(-z * w0 * t) * (Math.cos(wd * t) + (z * w0 / wd) * Math.sin(wd * t));
}
function ease(p) { return p <= 0 ? 0 : p >= 1 ? 1 : curve(p * T) / curve(T); }
var out = value;
if (numKeys > 1) {
  var n = nearestKey(time).index;
  if (key(n).time > time) n--;
  if (n >= 1 && n < numKeys) {
    var a = key(n), b = key(n + 1);
    var p = (time - a.time) / (b.time - a.time);
    out = add(a.value, mul(sub(b.value, a.value), ease(p)));
  }
}
out;
```

- On the website these play once, when their cause appears, and run back if the viewer scrolls back.
- Say only what's true: no staged testimonials; Starlink named as the connection, never as a partner.
